Description

DESCRIPTION
This tool kit is designed for aligning the camshaft, loosening and inserting the sprocket, and rotating the crankshaft. It is suitable for use on all diesel engines with a timing belt. The kit includes a carrying case, a timing belt, a camshaft sprocket, a crankshaft sprocket, and a timing belt tensioner. The carrying case is made of durable plastic and has a handle for easy carrying. The timing belt is made of high-strength rubber and is designed to last for a long time. The camshaft sprocket and crankshaft sprocket are made of high-strength steel and are designed to withstand high torque. The timing belt tensioner is made of high-strength steel and is designed to maintain the correct tension on the timing belt.
