Product description
This adapter is used for the removal of the vibration damper. The adapter is a black ring-shaped metal adapter with a silver-colored bolt attached to one side. The adapter has a central hole and a smaller hole on the opposite side where the bolt is located. The adapter is used for the removal of the vibration damper. The adapter is made of high-quality steel and is designed to be used with the H.C.B. B1960 vibration damper counterhold tool. The adapter is compatible with the 3.0L 6 cyl. engine. The adapter is sold as a single unit.
